Summary

I am a motivated and ambitious individual with a background in vocational education (SMK). With my virtual internship experience and foundational skills in frontend programming, I am passionate about pursuing a career in the technology industry.

During my virtual internship, I focused on developing my skills in frontend programming. I have a basic understanding of programming languages such as HTML, CSS, and JavaScript. I have applied this knowledge to various small-scale projects and have been able to create visually appealing and responsive user interfaces.

In addition to my programming skills, I possess excellent communication skills and work well in a team. I believe effective collaboration and clear communication are crucial to the success of any project.

As a recent graduate from SMK with limited work experience, I have a strong desire to continue learning and growing in this field. I am eager to take on new challenges and adapt quickly to technological advancements.

I am currently seeking opportunities to join a company that offers a supportive environment for professional growth. I am confident that with my high learning spirit and strong dedication, I can be a valuable asset to a team and contribute to the success of the company.
